## **Credit Enhancement, Financial Guarantees, and Financial Ratings: When Capital Markets and Insurance Worlds Collide**

**Date: Tuesday, March 27, 2007**

**Time: 12 noon to 1:30 p.m. (EDT)**

The insurance industry is heading into a period of soft premium. Historically in those periods, multi-line insurance companies have looked to market other products in order to boost revenues. Examples include financial guarantees or some involvement in the capital markets. This webinar will address the regulatory and financial oversight environment, and the pitfalls, as well as the opportunities in those markets/lines of business. Saul Ewing LLP's Jim Gkonos and Amy Kline will address the various legal issues, while Mark Puccia, Managing Director of Standard & Poors Financial Services Rating Group, will address financial rating issues.

A 15-minute Q&A period will follow the 75-minute presentation.

**Registration is limited to the first 100 participants, so please reserve early.** RSVP via email to Christine Brocco at [cbrocco@saul.com](mailto:cbrocco@saul.com). Instructions for connecting to the webinar will be sent via return e-mail to participants prior to the presentation. For questions, please contact Ms. Brocco at 215.972.7807.
