

Adam Goldberg is an Environmental Senior Project Manager from the Philadelphia, Pennsylvania practice at Langan Engineering and Environmental Services. He is an expert on site remediation and complex brownfields redevelopment in the Mid-Atlantic region, and in the past six years, on PFAS investigations and due diligence. He is a member of the PFAS History and Use Subcommittee on Interstate Technology and Regulatory Council (ITRC)'s PFAS Industry

practitioners' group. He is also a leader with Langan's Emerging Contaminants internal practice group. His PFAS focus is on property due diligence and transactional risk, site investigation and remedial navigation strategy, contaminated materials management, and PFAS investigation forensics for delineation and differentiation. Adam is a Licensed Site Remediation Professional in the state of New Jersey and works closely with Professional Geologists and Engineers in site remediation in Pennsylvania, Delaware, New York State, and beyond.
