OVERVIEW

Mr. Marc Estrada is a blockchain and greenhouse gas reduction entrepreneur. He founded GPT Secure, LLC which provides advanced data exchange and back-office services for retail commodity suppliers, generators, municipal utilities, and commercial clients. Mr. Estrada's unique and in-depth knowledge of commodity trading and sales has led to the development of an innovative Web 2 system that automates manual processes, eliminates redundancies, and provides technologically advanced data services. Mr. Estrada has a vision and passion to integrate the system into Web 3 and implement solutions that will positively impact our planet through the traceable reduction of negative environmental impacts and energy consumption.

Mr. Estrada has made a significant investment over the past several years in the design of a blockchain based system that solves the transparency, traceability, processing, billing, reporting, and scalability dilemma created by disparate carbon market platforms. He believes using the blockchain for transacting, transparency, and accountability will transform the economics of environmentally responsible business practices.

EDUCATION

San Jose State University, California, 1991
Bachelor of Science, Mechanical Engineering

EIT Certification, 1992

PROFESSIONAL EXPERIENCE

GPT Secure, LLC Feb 2004 to Present
